

# A place for...

## Podiatry

Podiatry provides comprehensive foot health assessments, combined with treatments to meet an individual's foot care needs including nail care, corns, calluses, skin care and biomechanical evaluation for sporting injuries.

Advice is also given to promote good foot health which can help with some of the problems associated with Multiple Sclerosis (MS) and other neurological conditions such as poor circulation and peripheral neuropathy.

Charity No. 1093691

**Merlin**  
**MS Centre**
